

About Us

With thirty years in practice, Dr. Bhatia is among the most experienced active obstetrician gynecologists today. Through each of these years, Dr. Bhatia has dedicated herself to her patients by forging lifelong connections with them, striving to better her understanding of current obstetrical and gynecological techniques, and providing consistent support as her patients endure difficulties or discover successes. Through these commitments, Dr. Bhatia has developed an enduring and robust practice that provides care to women in each and every one of their life stages. Indeed, her goal is to become your doctor, and friend, for life.

A NOTE FROM THE DOCTOR

“ I pride myself on my commitment to patients. My commitment manifests itself through a compassionate disposition and a self-demanding approach. I treat each patient as I would a member of my own family. I draw on my significant experience as a clinician, and I stay up to date with current treatment options.

All of these commitments form the basis for my experience as a physician. But they are secondary to my fundamental promise to you: I pledge to build an enduring relationship with you, if you choose to visit me. I will be available each and every time that you make an appointment or express a concern. And I will use each and every resource I possess to alleviate your concerns and help you achieve your goals.”

– Dr. Neera Bhatia

Experienced, Compassionate Care.
For Women. By a Woman.

New Technology

In the rapidly evolving field of medicine, new technology often outpaces our ability to harness its usefulness for patients on a daily basis.

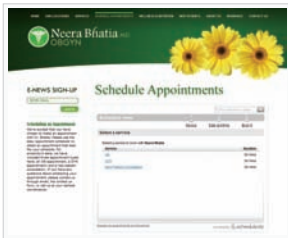

Dr. Bhatia's offering of the GE 3D/4D Ultrasound ensures that patients gain the most from the newest imaging technology available. Among the many improvements is a greatly enhanced resolution for physician and patient viewing of the baby. This increased resolution allows the patient and her family to see her baby in high-definition and obtain crystal clear images of the baby's face! The increased resolution also permits more comprehensive fetal and maternal monitoring to ensure a safe and healthy pregnancy.

Conventional sonogram machines have limited our ability to help families in their visualization of their unborn children. With this new technology and our capable staff, we are working to help families have a most successful and gratifying pregnancy!

Scheduling an Appointment

We're excited that you have chosen to make an appointment with Dr. Bhatia. You can choose a time most convenient for you to visit and communicate with us in one of the following 3 ways:

- (1) Call us at (210) 222-2694 and speak to our staff;
- (2) Use our easy appointment scheduling module online to set your time; or
- (3) Email us at info@neerabhatiaobgyn.com. And, remember that Dr. Bhatia wants to make you comfortable so don't hesitate to ask for a time that best suits you.

Services

OBSTETRICS

- High resolution 2D and 3D ultrasound for comprehensive evaluation of your baby in the first trimester
- Prenatal surveillance of growth and development of the baby's vital organs, including the fetal heart
- Monitoring fluid and movement to evaluate your baby's well being
- See your baby before he or she is born with 3D/4D ultrasound and bring a DVD copy of your ultrasound home with you*

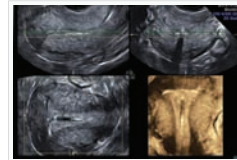

INFERTILITY

- Monitoring health and number of ovarian follicles in response to infertility treatments
- Monitor thickness of uterine lining in preparation for planning pregnancy and evaluating fertilization

GYNECOLOGY

- In-depth evaluation of fibroids and other causes of abnormal uterine bleeding
- Color flow Doppler technology allows improved evaluation of pelvic pain
- Improved monitoring of all areas of the female reproductive tract enables a more comprehensive examination for patient and physician

GYNECOLOGY ONCOLOGY

- Evaluate ovarian and adnexal masses
- Comprehensive monitoring for ovarian cancer when used in conjunction with a simple blood test
- Improved resolution of masses allows for more effective coordination with gynecologic oncology specialists and improved patient outcomes

Packages Available

A private ultrasound experience is one of the many guarantees that Dr. Bhatia ensures her patients in choosing her practice. The following packages represent three of the highlighted offerings from Dr. Bhatia. Each package includes a "private" day in the office, with no other patients present, for the ultrasound. Scheduling, of course, is at the patient's convenience. The packages also include printed and digital images along with an extended viewing session for the patient and her family. Finally, we offer discounts to our pricing packages. Consult Dr. Bhatia or our social media network, where we offer great deals!

2D ULTRASOUND: \$100

This package is designed for the couple that wants to determine the gender of their baby and visualize fetal movements. Additionally, the couple will be able to listen to the baby's heartbeat! The package includes an extended viewing for family and two high resolution color images. Digital images are included on a CD for an additional \$20. Please note the ultrasound viewing is in 2D.

3D ULTRASOUND: \$200

This package provides the same benefits as the 2D ultrasound with the added service of 3D/4D images of the unborn baby. The session is guaranteed to last at least 15 minutes and includes the following: 5 color images and a CD with digital images uploaded.

CONTINUED MONITORING: 3 Visits for \$400

This package provides two 3D/4D viewing opportunities in addition to a 2D ultrasound. The three visit option is best for family viewing and for families looking to document the baby's growth with full resolution color prints and digital images at each visit.
